Type description

The hand-operated diaphragm valve Type 3232/3233 consists of a hand-operated actuator, a diaphragm and a 2-way body. The manual actuator with plastic handwheel ensures use in hygienic or aggressive ambient conditions. The flow-optimised valve body with minimum dead space enables high flow rates and a wide range of possible applications. The valve bodies are available in PP, PVC-U, PVDF. The membranes are available in the usual materials and designs. The actuator has a compact design and is compatible with all other Bürkert diaphragm valves.
